- Code data agnostic charts and visualizations

New York Code + Design Academy, New York, NY

Web Development Intensive

September – December 2014

- 12 week intensive program focused on Ruby on Rails web development
- Project-based learning experience

Projects

On-Board

<https://github.com/nkabrown/On-Board>

On-Board was designed to enhance student experience prior to beginning the Web Development Intensive program at New York Code + Design Academy. It provides a platform for students to engage in prep-work and connect with classmates via LinkedIn, Twitter, Tumblr and Github. The app was built with consideration for the administrator's needs — providing an easily navigatable dashboard and email invitation system. On-Board was adopted by NYCDA to onboard WDI students starting in January 2015.

Sterling National Bank

Accounts Payable Administrator

2008 – April 2014

- Accurately and efficiently process daily invoices and cut checks for Sterling National Bank and three subsidiaries
